

Simple Arithmetic Operations in Python

1. Addition

```
a = 10
b = 5

print(a + b)

Output:
15
```

2. Subtraction

```
a = 10
b = 5

print(a - b)

Output:
5
```

3. Multiplication

```
a = 10
b = 5

print(a * b)

Output:
50
```

4. Division

```
a = 10
b = 5

print(a / b)

Output:
2.0
```
